The Evolution of Polygel

created by

PAULINE FEINAUER®

AMORE  ULTIMA

GENERAL INSTRUCTIONS-

Prep the natural nail as per professional protocol for gel nail application.

~Apply a thin layer of Dip In on the prepared natural nail. Do not cure. (TIP-For problem lifters, apply a very thin layer of Amore Bonder, cure, and THEN apply the thin layer of Dip In)

~Brush some Dip In on a working tile/plate (you will use this to dip your brush into in order to move the Builder once it's applied to the nail)

~Use a small spatula to scoop out the desired amount of builder and place directly on the nail.

(TIP- using a spatula saves the bristles of your brush)

~Dip your working brush into the Dip In and begin shaping the builder with your brush. Re-apply the Dip In to your brush as needed. (Unlike alcohols and or slip products used in other polygel products, you will find that the Dip In does not evaporate therefore typically you will only need to dip your brush into Dip In once and you'll be able to shape the artificial nail with PAB Builder)

(TIP- Use the belly of the brush to shape the builder with a patting motion much like applying an acrylic bead-rather than trying to apply it like gel using the tip of the bristle)

~Once you have the builder where you want it-cure it for 60 seconds in an LED/Hybrid lamp or 120 seconds in a UV only lamp

(TIP-you will notice that the surface of the builder levels to a nice smooth finish if you let it sit for a moment before curing, this is the PAB line's unique "honey leveling effect")

~Finish with PAB High Gloss (TIP-do not leave jar open and/or exposed to light! Due to its strong polymerization qualities, it WILL cure under indoor lighting!) Due to its viscosity, PAB High Gloss is quite thin, so we suggest applying it one nail at a time. Cure High Gloss for 60 seconds in an LED/Hybrid lamp or 120 seconds in a UV only lamp. High Gloss has a tacky layer after curing. Enjoy a long lasting amazing gloss!

BEAUTIFUL BOOMER INSTRUCTIONS

To create Beautiful Baby Boomer nails with PAB follow these simple steps below:

- Prep natural nails
- Apply a very thin layer of Amore Bonder if necessary, cure
- Working your Dip In from your tile, apply a thin layer to the nail one nail at a time ~DO NOT CURE!~
- Using your spatula, scoop a small amount of PAB White Builder and apply it directly to the nail
- Dip your brush into Dip In once to help level/blend product. Using the belly of your brush and a patting motion, blend White Builder towards cuticle area keeping most of the product on the free edge. REPEAT THIS ON ALL 5 NAILS AS PAB WILL NOT MOVE-IT ONLY LEVELS! AMAZING TIME SAVER.
- Cure for 60 seconds in the LED/Hybrid lamp or 120 seconds in a UV lamp
- Apply a thin coat of Dip In again one nail at a time ~DO NOT CURE!~
- Using your spatula, scoop a small amount of either Soft Rose or Dark Rose and place it directly onto the nail close to the cuticle area.
- Dip your brush into Dip In to now balance the product. Focus on placing your apex and blending Pink towards the White free edge creating a beautiful babyboomer look. REPEAT THIS ON ALL 5 NAILS AS PAB DOES NOT MOVE -IT ONLY LEVELS!
- Cure for 60 seconds in the LED/Hybrid lamp or 120 seconds in a UV lamp
- Wipe slightly tacky residue with your preferred after wipe solution.
- Shape nails. You will love the way PAB files and the very minimal filing that it will require.
- Apply PAB High Gloss one nail at a time and cure.
- Wipe tacky residue.
- Apply your favourite cuticle oil.
- ENJOY the easiest set of Baby Boomers EVER!
